**CLOMA Pavillion—Alliance creates new innovation**  
It has become necessary for society to promote worldwide efforts to overcome the marine plastic litter issue, a newly emerging global challenge. To decrease such litter, conducting appropriate control of waste is urgently needed, including through efforts for preventing littering, further enhancement of the 3Rs (Reduce, Reuse and Recycle) initiatives involving plastic products, and further development and adoption of plastics with excellent biodegradability and materials alternative to plastics, for e.g., paper. Against this backdrop, Japan Clean Ocean Material Alliance was established as a new platform that helps a wide variety of cross-sectoral stakeholders to collaborate and accelerate innovation.

**Japan Good Packaging Pavilion 2022**  
Showcasing the best of packaging innovation and technology in the country, a special exhibit of more than 100 winning packages from this year's Japan Good Packaging Contest and Japan Star 2022 Awards.

**Package Design Pavilion**  
Package design is one of the most important elements of product marketing. Be amazed by the outstanding graphic and structural designs on display in this pavilion.
